hi there,

My name is Luke Masters, and I am an Architectural Technologist by profession.

I would just like to thank you for taking the time in considering my application to the Samsung Developers Club of Elite Graphic Designers ;-)

For my submission I have designed a Westworld inspired theme and have generated all the graphics based on what I have seen and come to love on the show when it comes to the graphical interfaces on the evil scientists tablets.

I have always loved unique customization when it comes to my phone interface, and would love to share this with other budding graphic designers and phone users alike. Admittedly I am a stickler for detail, so every aspect of my presented theme has been custom made and refined, even if not possible on the theme creator software. (but it should be, so can we push the boundaries here?)

I have absolutely loved the last few days in creating this theme and I hope that you enjoy it as much as I do, and give me the opportunity to bring it to life for everyone to enjoy.

Thanks again for your time, it is greatly appreciated.

stay safe out there,

Luke
